

ABSTRACT

The invention relates to a superabsorbent polymer comprising a composition comprising a polymeric resin composition comprising from about 55 to about 99.9 wt.% of polymerizable unsaturated acid group containing monomers, from about 0.001 to about 5 5.0 wt.% of internal crosslinking agent and from 0 to 25 wt % of a preneutralizing agent; wherein the polymeric resin composition is preneutralized from 0 to about 50 mole %; and a water swellable, water-insoluble aminopolysaccharide polymer wherein when the superabsorbent polymer is contacted with an aqueous solution, the polymeric resin composition is neutralized by the aminopolysaccharide polymer so that the superabsorbent 10 polymer has a degree of neutralization of about 20 mole % or more than the preneutralization degree of the polymeric resin composition.
